

May 3, 2020

Dear Shareholder:

The summer season is upon us and we ask that you **PLEASE MONITOR** your water usage carefully. Reset your sprinklers frequently as power surges, seasonal weather conditions and plant size should be accounted for. For the summer of 2020 the watering schedule is as follows:

All addresses on :

Highland Drive Silver Sage Drive Countryside Circle WEDNESDAY FRIDAY SUNDAY

Fairview Mountainview Starview Snowview Drives TUESDAY THURSDAY SATURDAY

We are fortunate to have a good snowpack from the winter which will help maintain water sources after years of low snowpack, but we still should use water wisely , especially in the water greedy summer.

There should be no watering on Monday. Please **do not** water between 9AM and 7PM. If you begin watering early in the spring, your lawn will not send its roots down. Shallow roots, typically caused by overwatering, produce unhealthy grass. The deeper the roots the more healthy the grass and the easier it is to maintain. Later, if you adjust your mower height to at least 2.5 to 4 inches this will encourage deeper roots and shade the soil. Or, consider xeriscape as an alternative to water thirsty grass.

Please be aware that even a small leak can waste a tremendous amount of water. Closely monitor your toilets, fixtures, water softeners and appliances for leaks. Timely repairs can save you a lot of money in overage fees while preventing significant water resources being wasted. The remote meters have been installed and we read the meters all winter. The new meters ensure the accuracy of our monthly meter reads and help to identify leaks much more quickly.

We would like to remind shareholders that there is a variety of information on our website (highvalleywater.com) such as using pesticides properly and managing your septic system correctly.

Please do your part to help preserve and protect your water supply ! Use water wisely !
